Hi, I'm a developer that loves clean & elegant code.

A little bit about me.

ve made my home base in Providence, Rhode Island, with my small growing family. My journey into tech started with a degree in journalism. As I started sharing my writing online, I was fascinated with how easily I could get my voice out there. I was hooked and wanted to learn how to build my own site to fit my own specific needs.

That curiosity then opened a door that could never be shut. When I learned how to build my first website, I realized I found something that gave me the freedom & versatility I was looking for in my work. Now I've made a full switch to front-end development, where I can use my organization skills and eye for detail to write clean, elegant code.
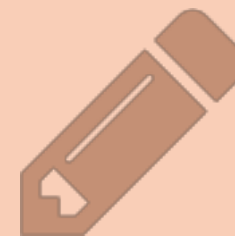

Hand-Coded
HTML

My focus is writing clean, well formatted, semantic HTML5 by hand to make sure that the content is easy to read, easy to collaborate, trouble-shoot and accessible.

Well-Organized
CSS

I pride myself on writing CSS that is easy to read and build on. I focus on keeping my CSS lean and fast to load, and I make it a habit to stay up to date on current best practices.

Ease Converting
Designs Into Code

You can trust me to take a designer's PSD and quickly & accurately convert it into a webpage that is pixel-perfect match.

Like what you see?
Let's meet for a cup of coffee.
